

## **Traffic lights in Llantrisant Road, January 2018**

Cllr McKerlich has been supplied with the following information:

### *Monday 8<sup>th</sup> January*

Redrow to place 2-way lights on the outbound side of Llantrisant Road between Heol Isaf junction and Clos Parc Radur. This is to remove the hedgerow and allow egress to the site. These will operate 9:30am-3:30pm.

The disruption from Radyr into Cardiff will be limited but there may be some interaction at the roundabout outbound depending on traffic flows.

Persimmon to place 2-way lights near the junction of Cardiff Road but towards Cardiff. This is to commence making an access for haulage of fill material into the site. These will operate 9:30am-3:30pm.

### *Monday 15<sup>th</sup> January*

Barratts to place 2-way lights on Llantrisant Road to remove hedgerow. These will operate 9:30am-3:30pm.

The majority of disruption for the next few weeks will be off-peak movements towards Cardiff on Llantrisant Road. This will be due to the fact there will be three sets of lights. We are hoping that this will deter users from Talbot Green end coming this way and promote the use of the M4 and A4232. We will continue to monitor the flows and look at concerns raised.

As highlighted this is only the commencement of the work and there will be the requirement for further Traffic Management to deliver the S278 Works. Once we have received this detail we will circulate but at this time we are still awaiting information to be provided on phasing of the delivery of the new road layouts.
